S83 | ISIC_0028029
True: mel Prediction/Grad-CAM target: mel Probability: 0.712

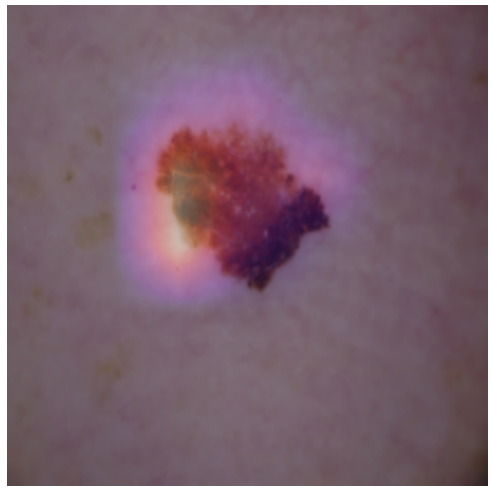

Input RGB224

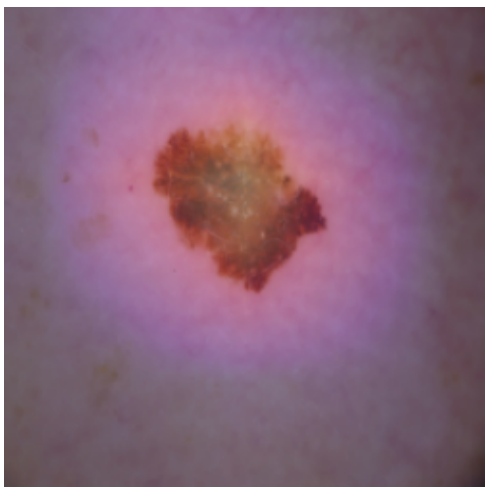

S06 ConvNeXt-Tiny

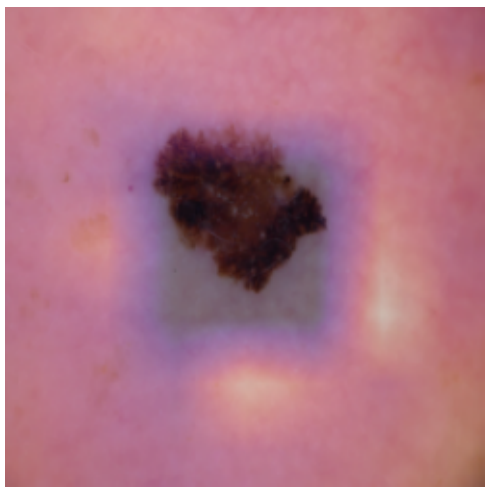

S18 ConvNeXt-Small

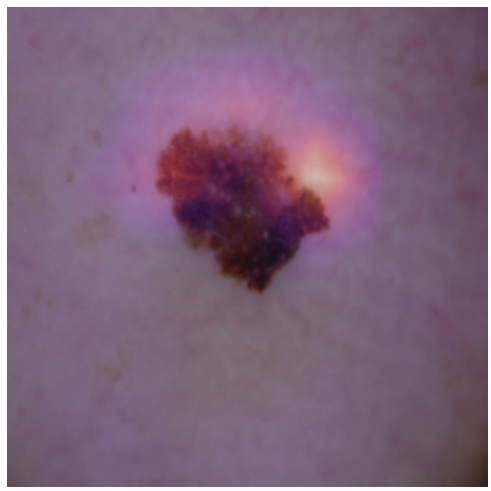

S15 DenseNet201

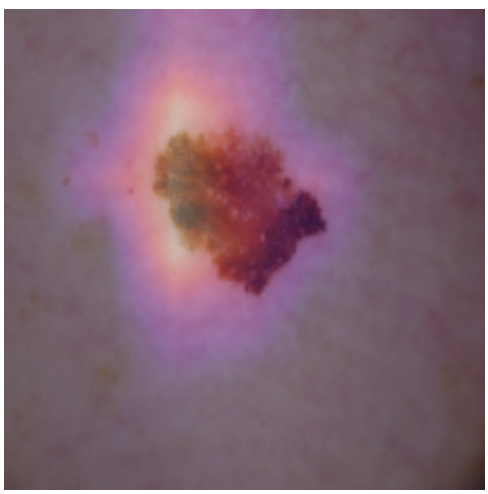

S10 EfficientNetV2-S

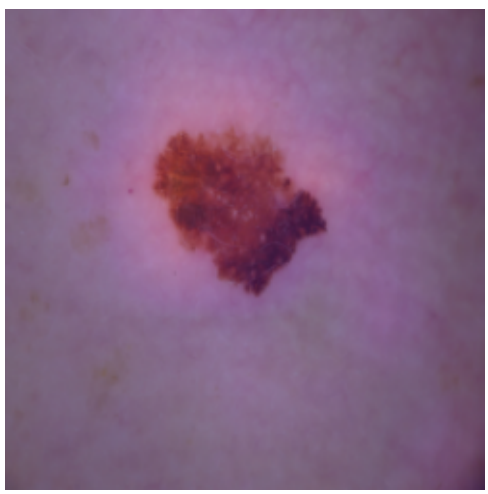

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

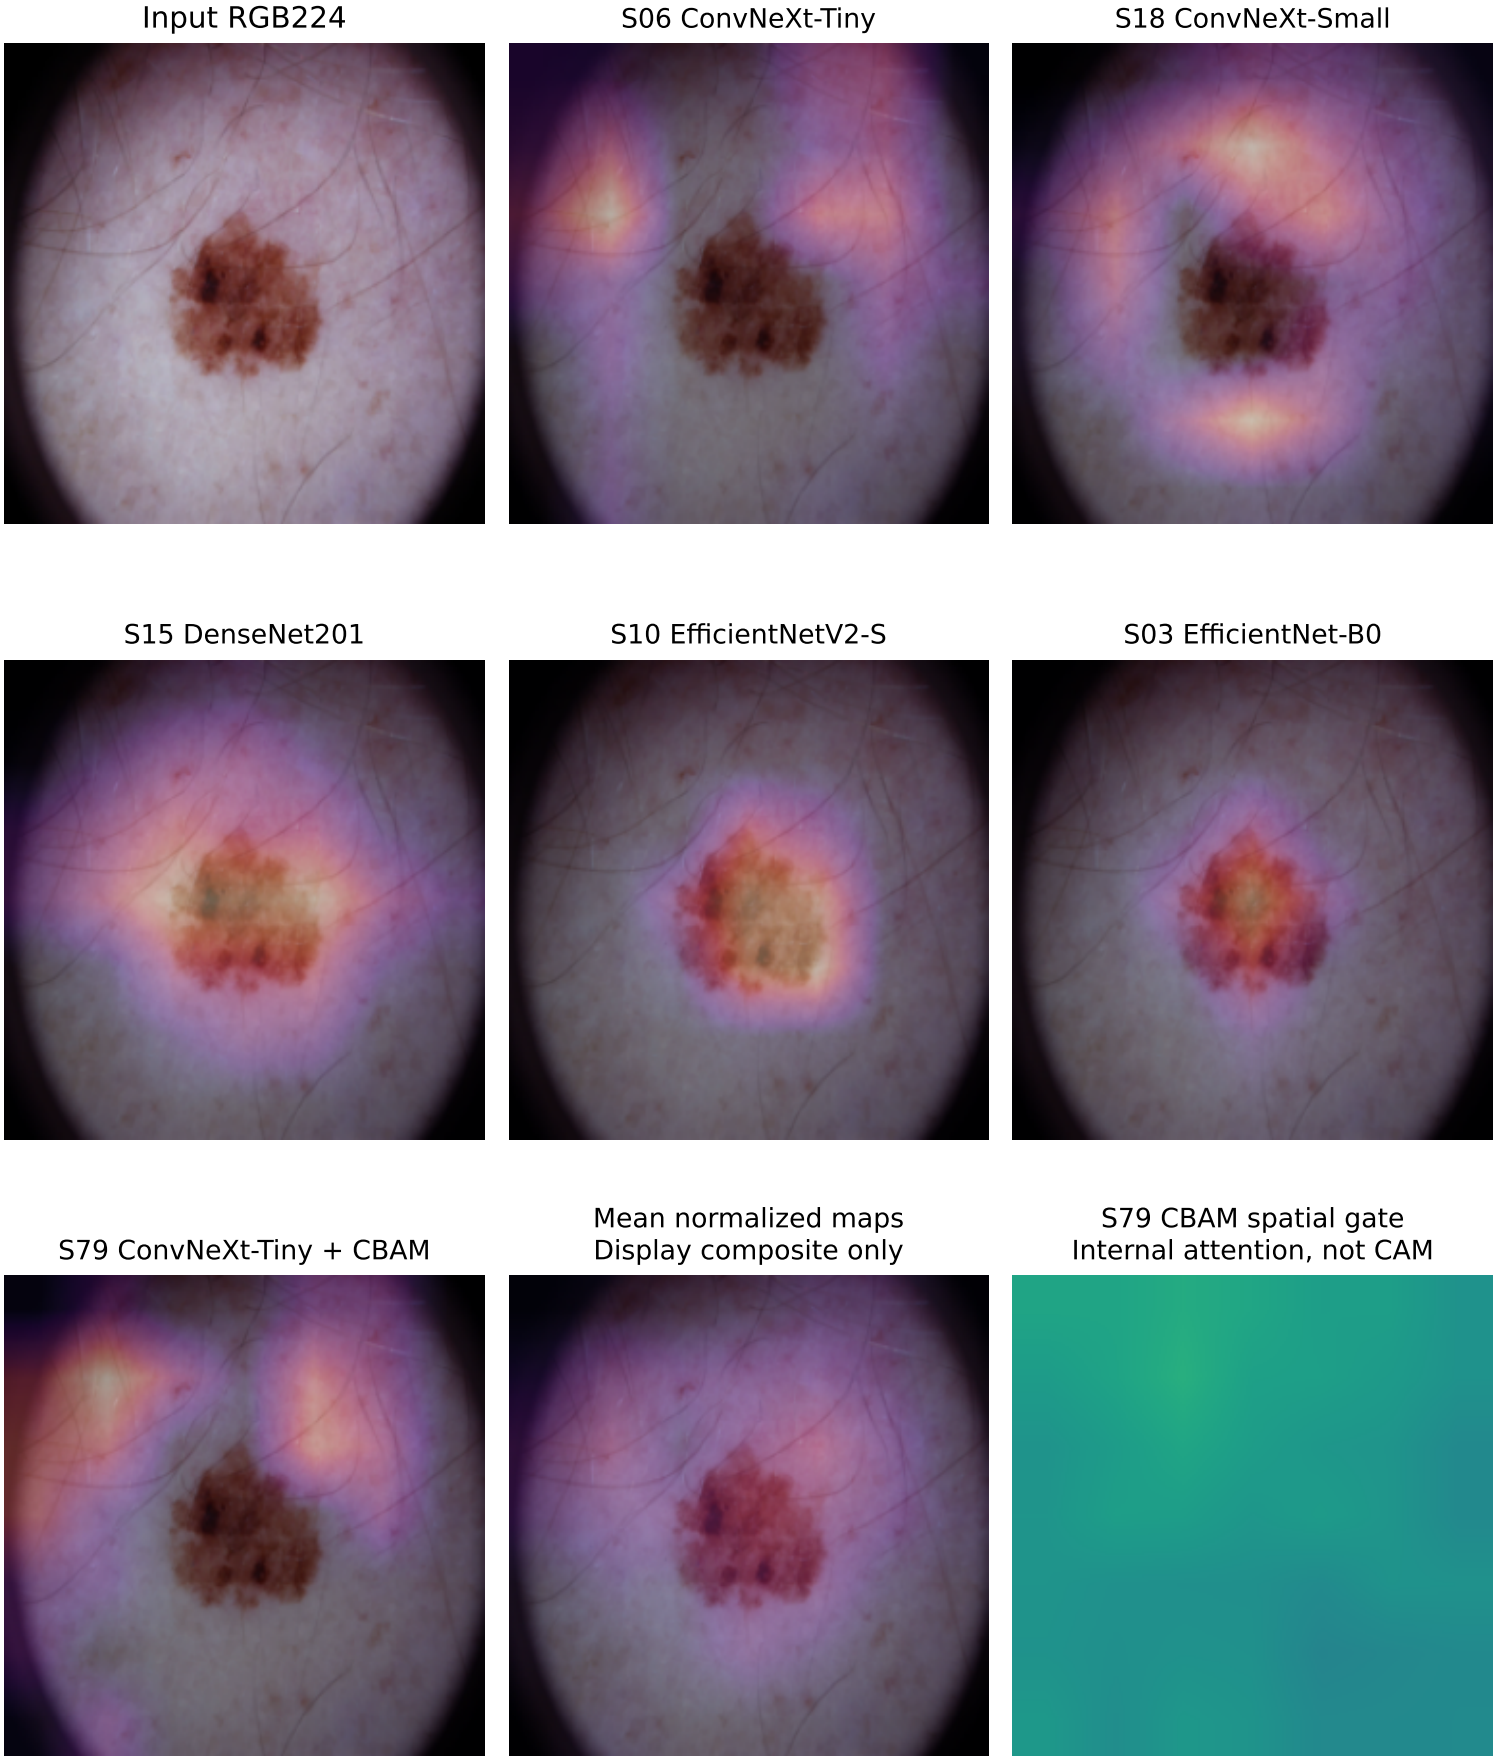

S79 CBAM spatial gate
Internal attention, not CAM

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

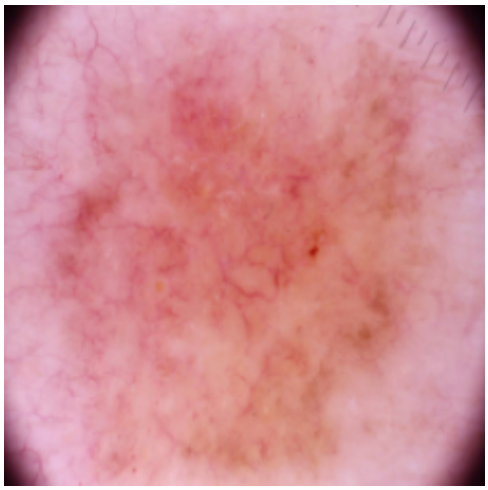

S83 | ISIC_0033611
True: mel Prediction/Grad-CAM target: nv Probability: 0.903

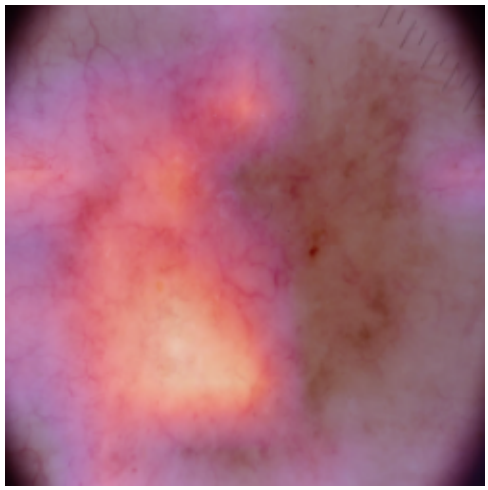

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0026319
True: akiec Prediction/Grad-CAM target: akiec Probability: 0.778

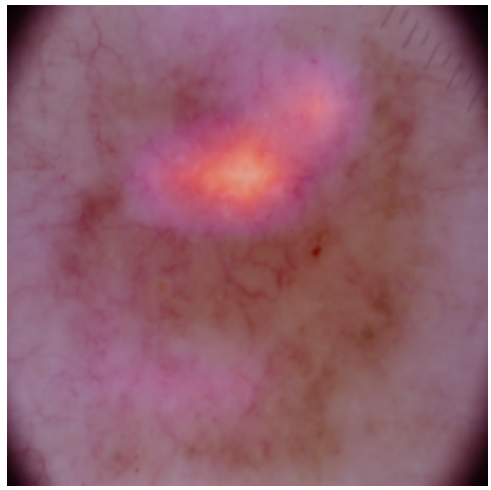

Input RGB224

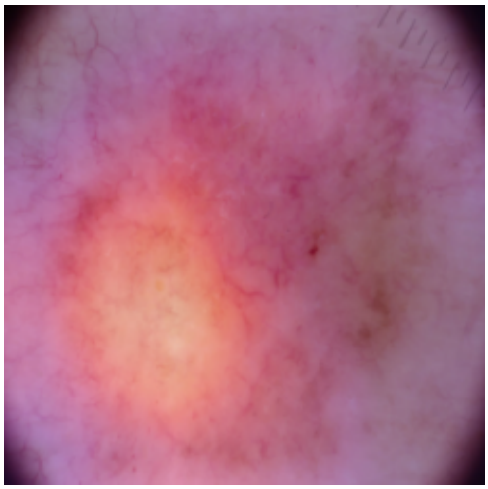

S06 ConvNeXt-Tiny

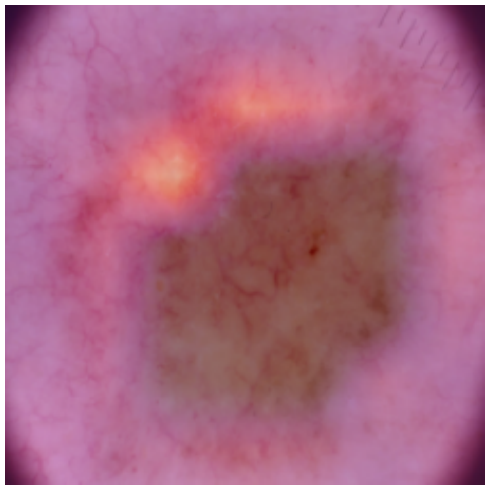

S18 ConvNeXt-Small

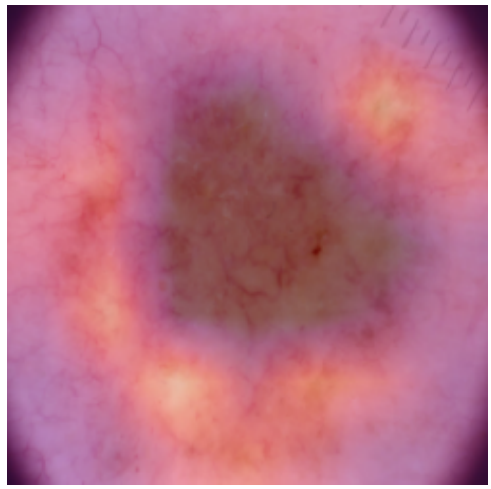

S15 DenseNet201

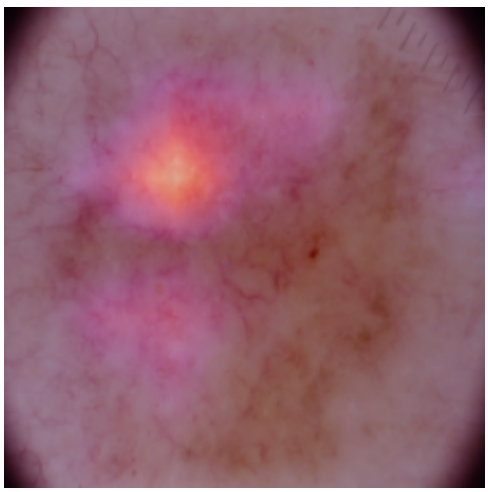

S10 EfficientNetV2-S

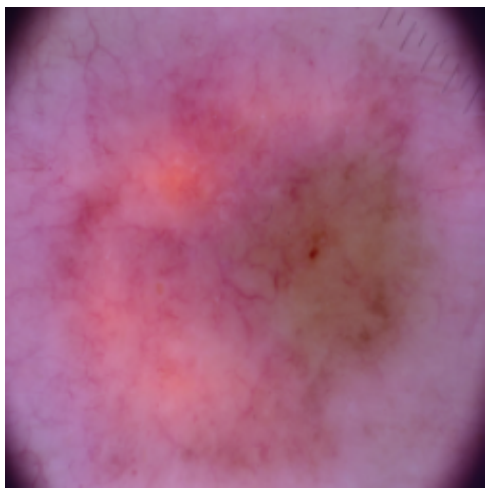

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

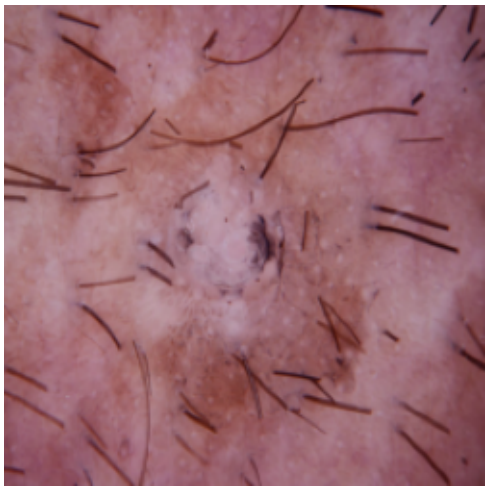

S79 CBAM spatial gate
Internal attention, not CAM

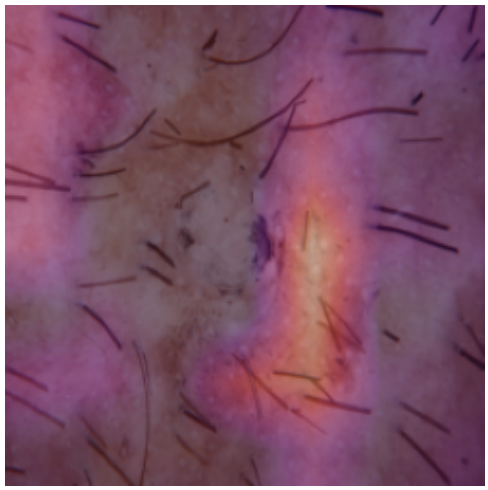

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0031506
True: akiec Prediction/Grad-CAM target: bkl Probability: 0.566

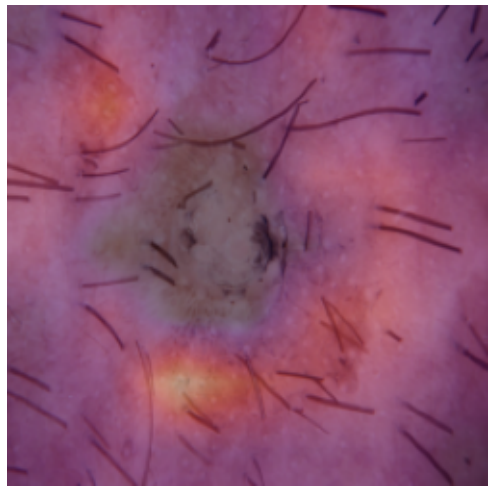

Input RGB224

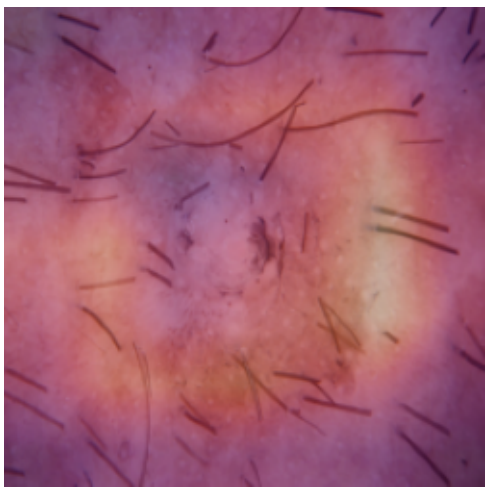

S06 ConvNeXt-Tiny

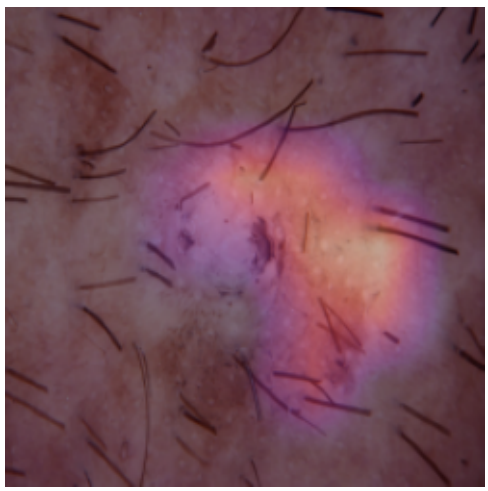

S18 ConvNeXt-Small

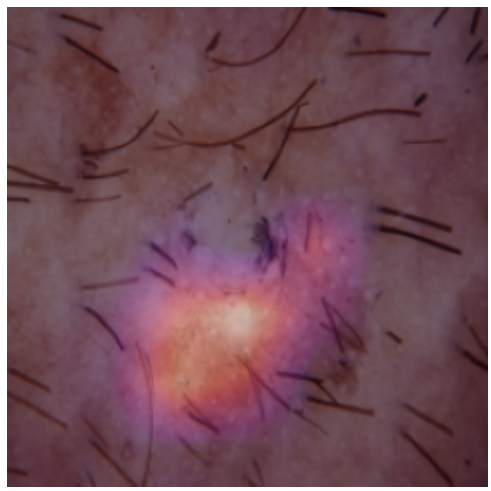

S15 DenseNet201

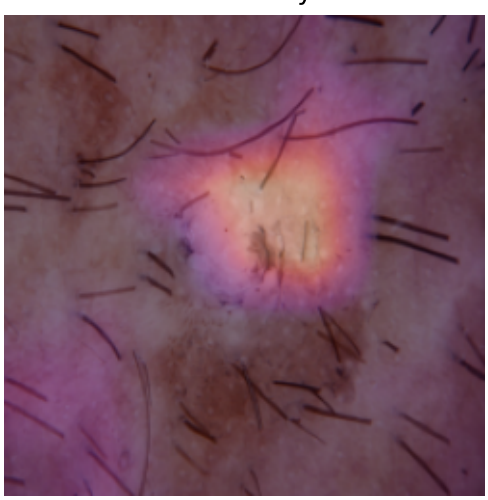

S10 EfficientNetV2-S

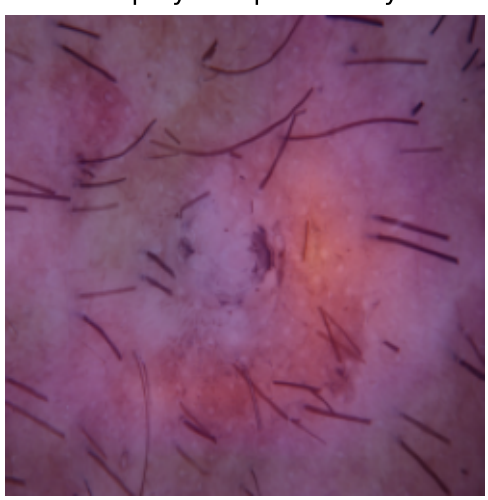

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

S79 CBAM spatial gate
Internal attention, not CAM

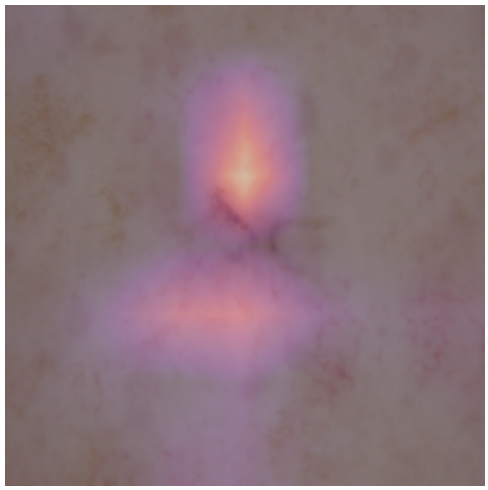

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0028973
True: bcc Prediction/Grad-CAM target: bcc Probability: 0.997

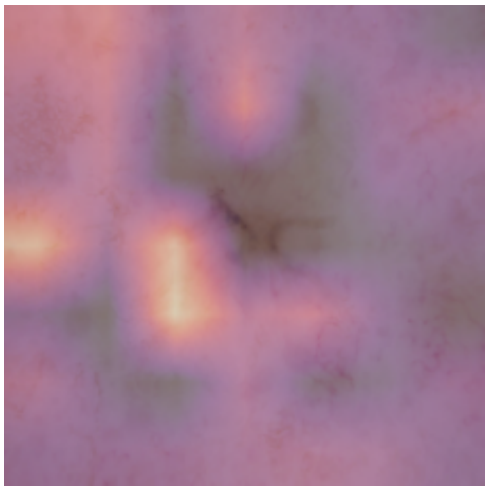

Input RGB224

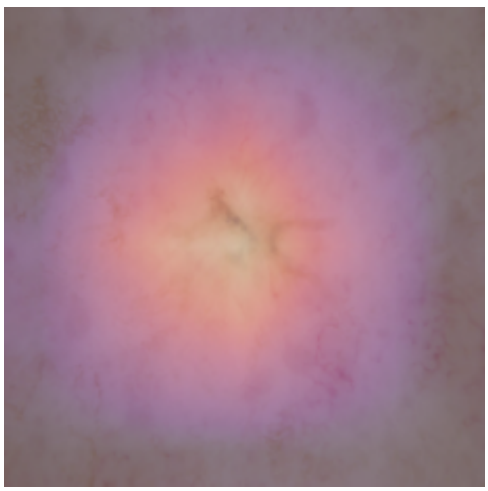

S06 ConvNeXt-Tiny

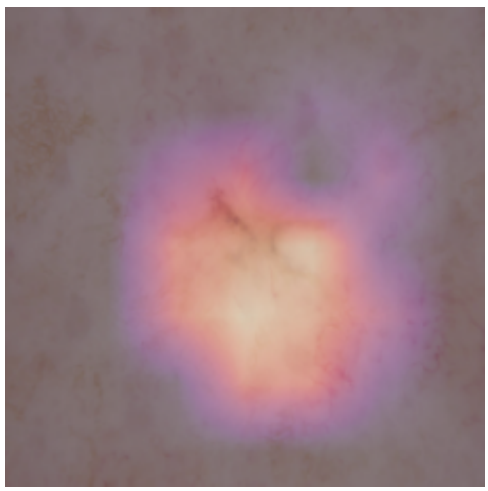

S18 ConvNeXt-Small

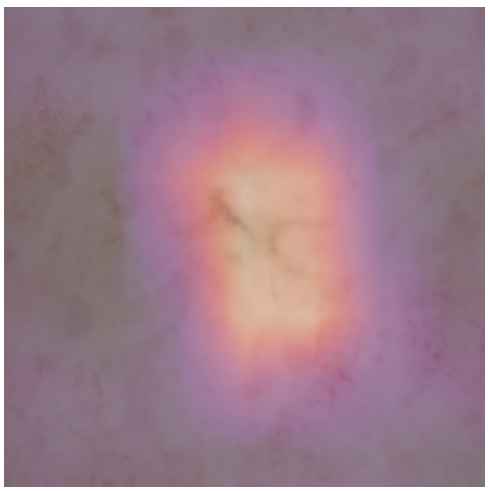

S15 DenseNet201

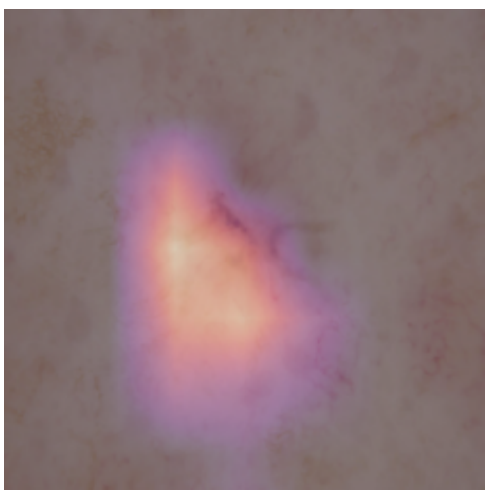

S10 EfficientNetV2-S

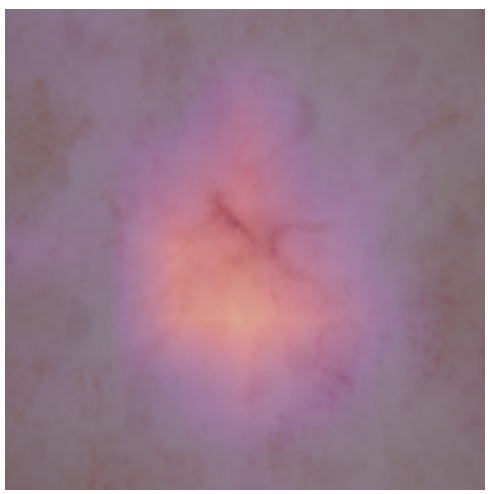

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

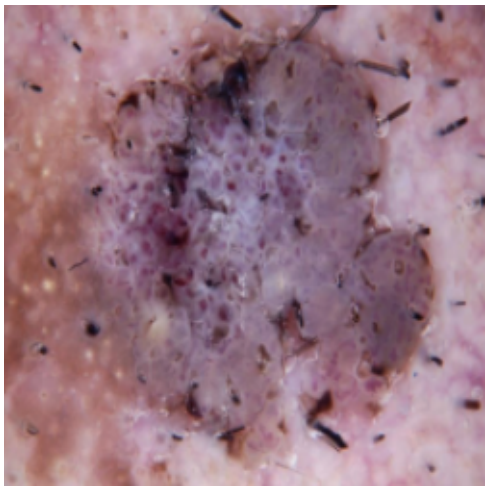

S79 CBAM spatial gate
Internal attention, not CAM

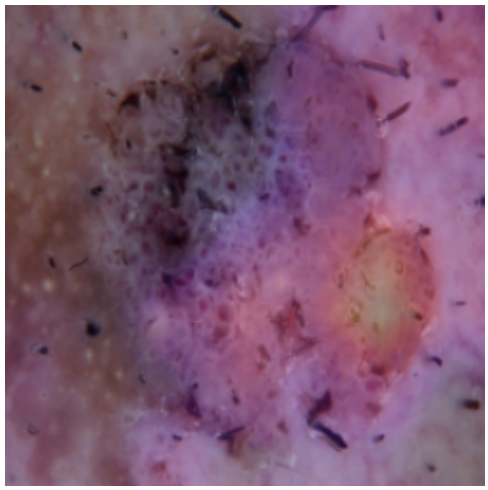

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0030276
True: bkl Prediction/Grad-CAM target: bkl Probability: 0.998

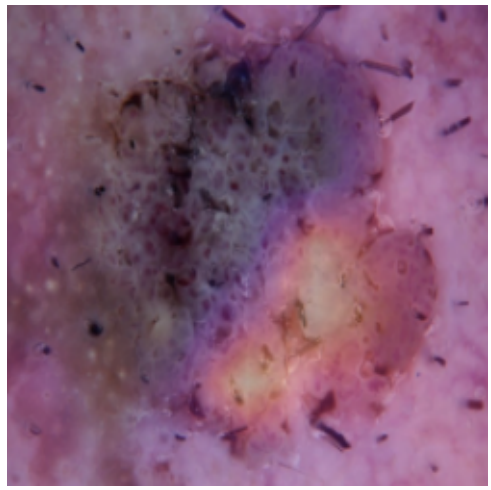

Input RGB224

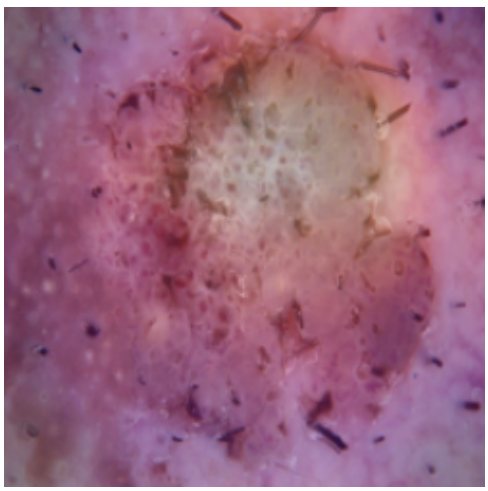

S06 ConvNeXt-Tiny

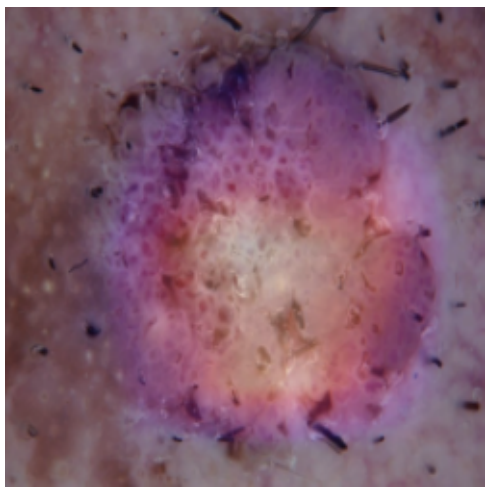

S18 ConvNeXt-Small

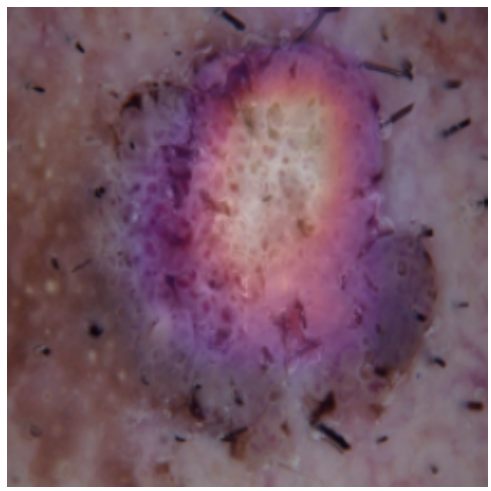

S15 DenseNet201

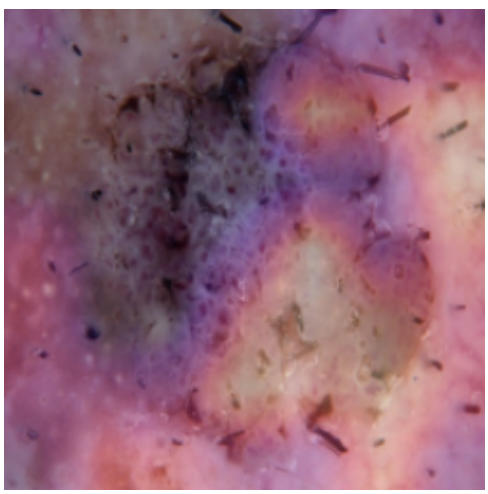

S10 EfficientNetV2-S

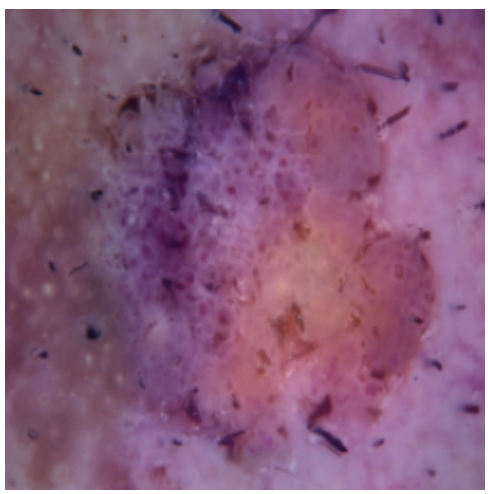

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

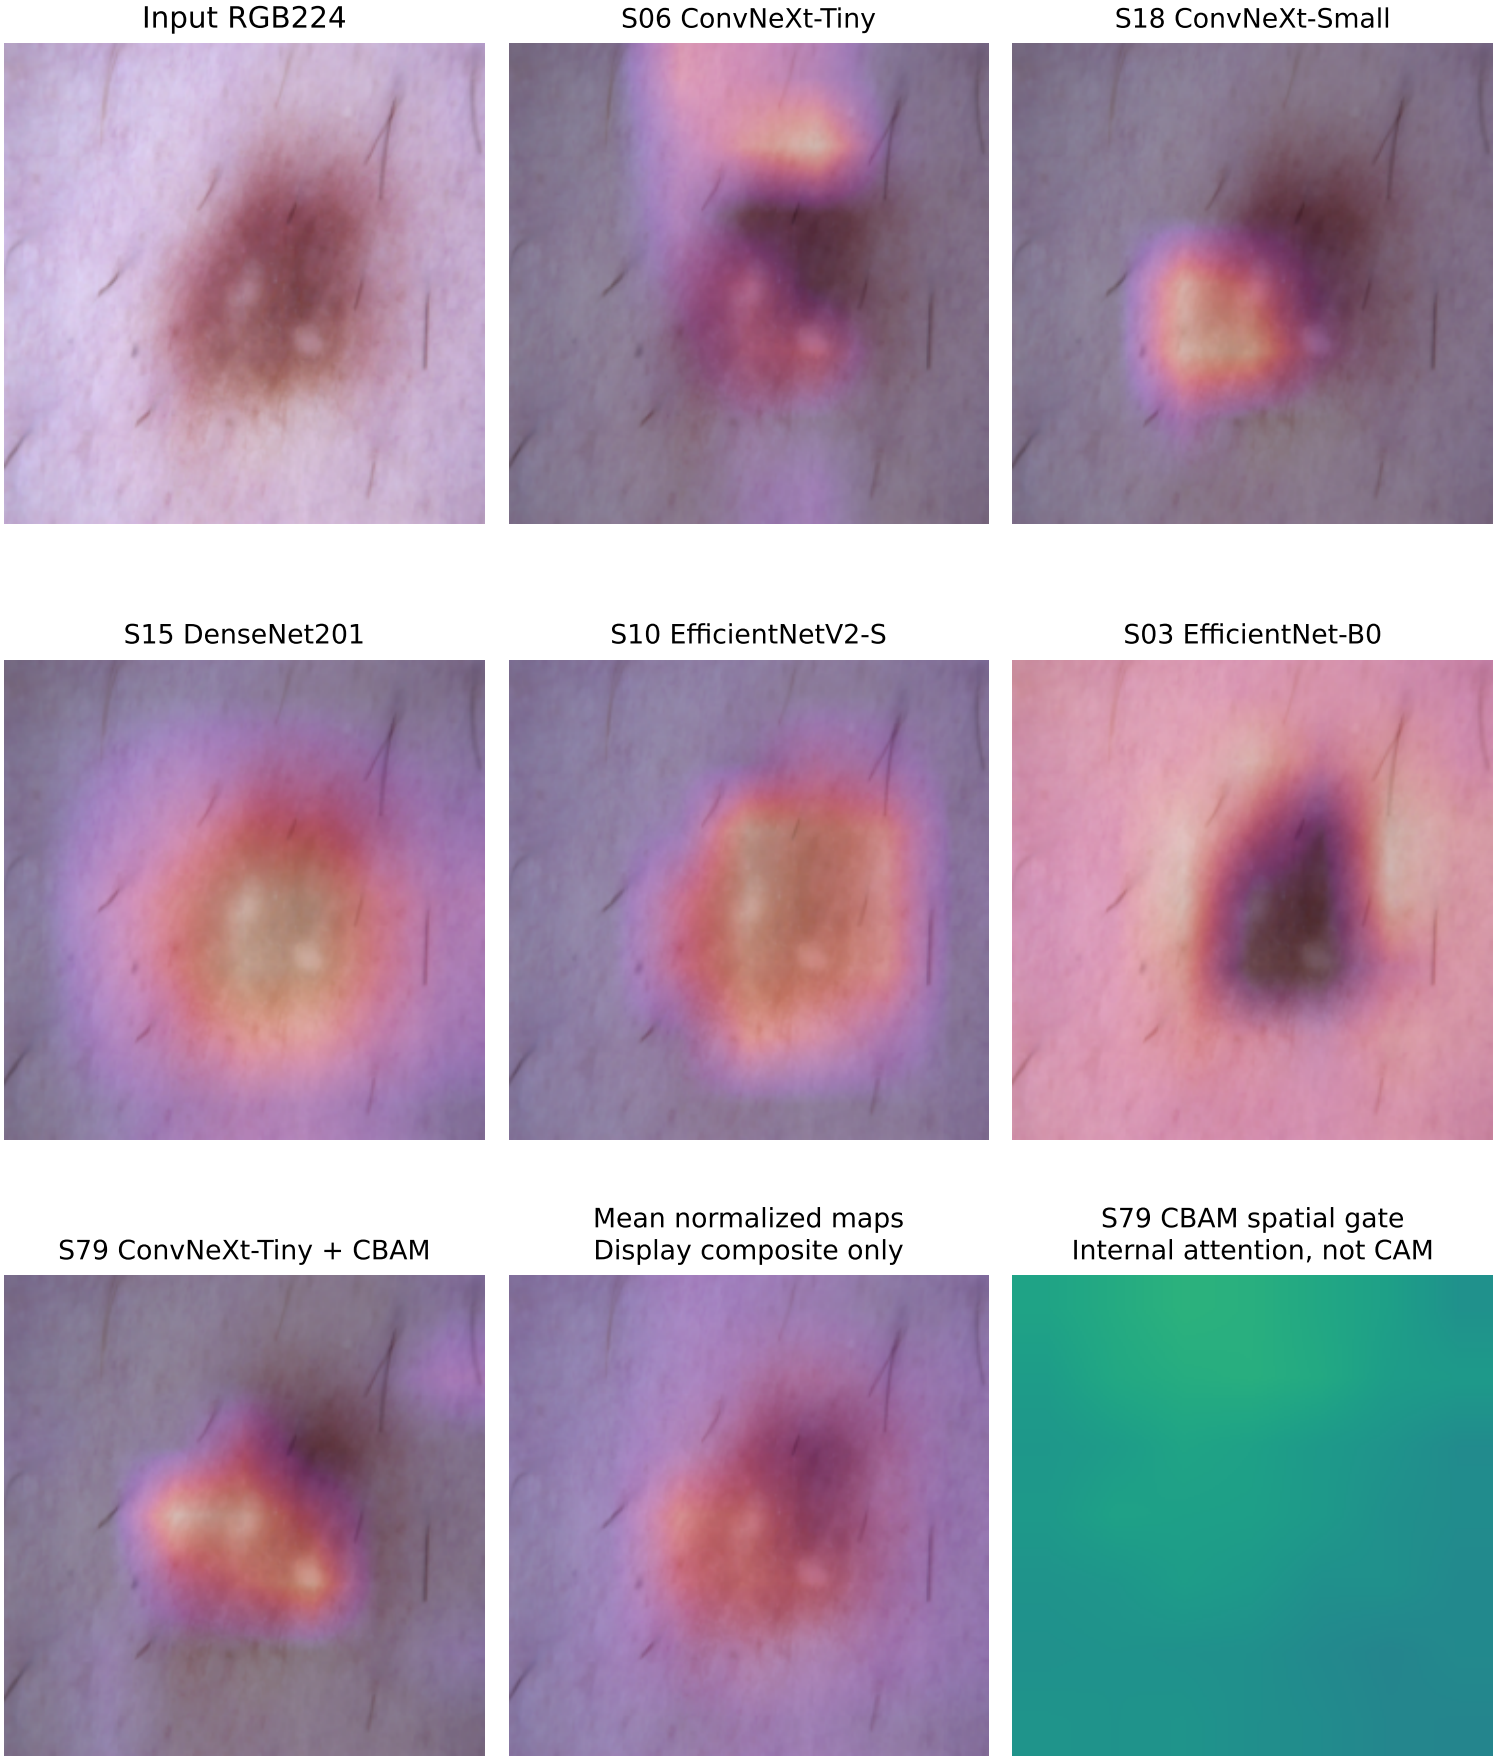

S79 CBAM spatial gate
Internal attention, not CAM

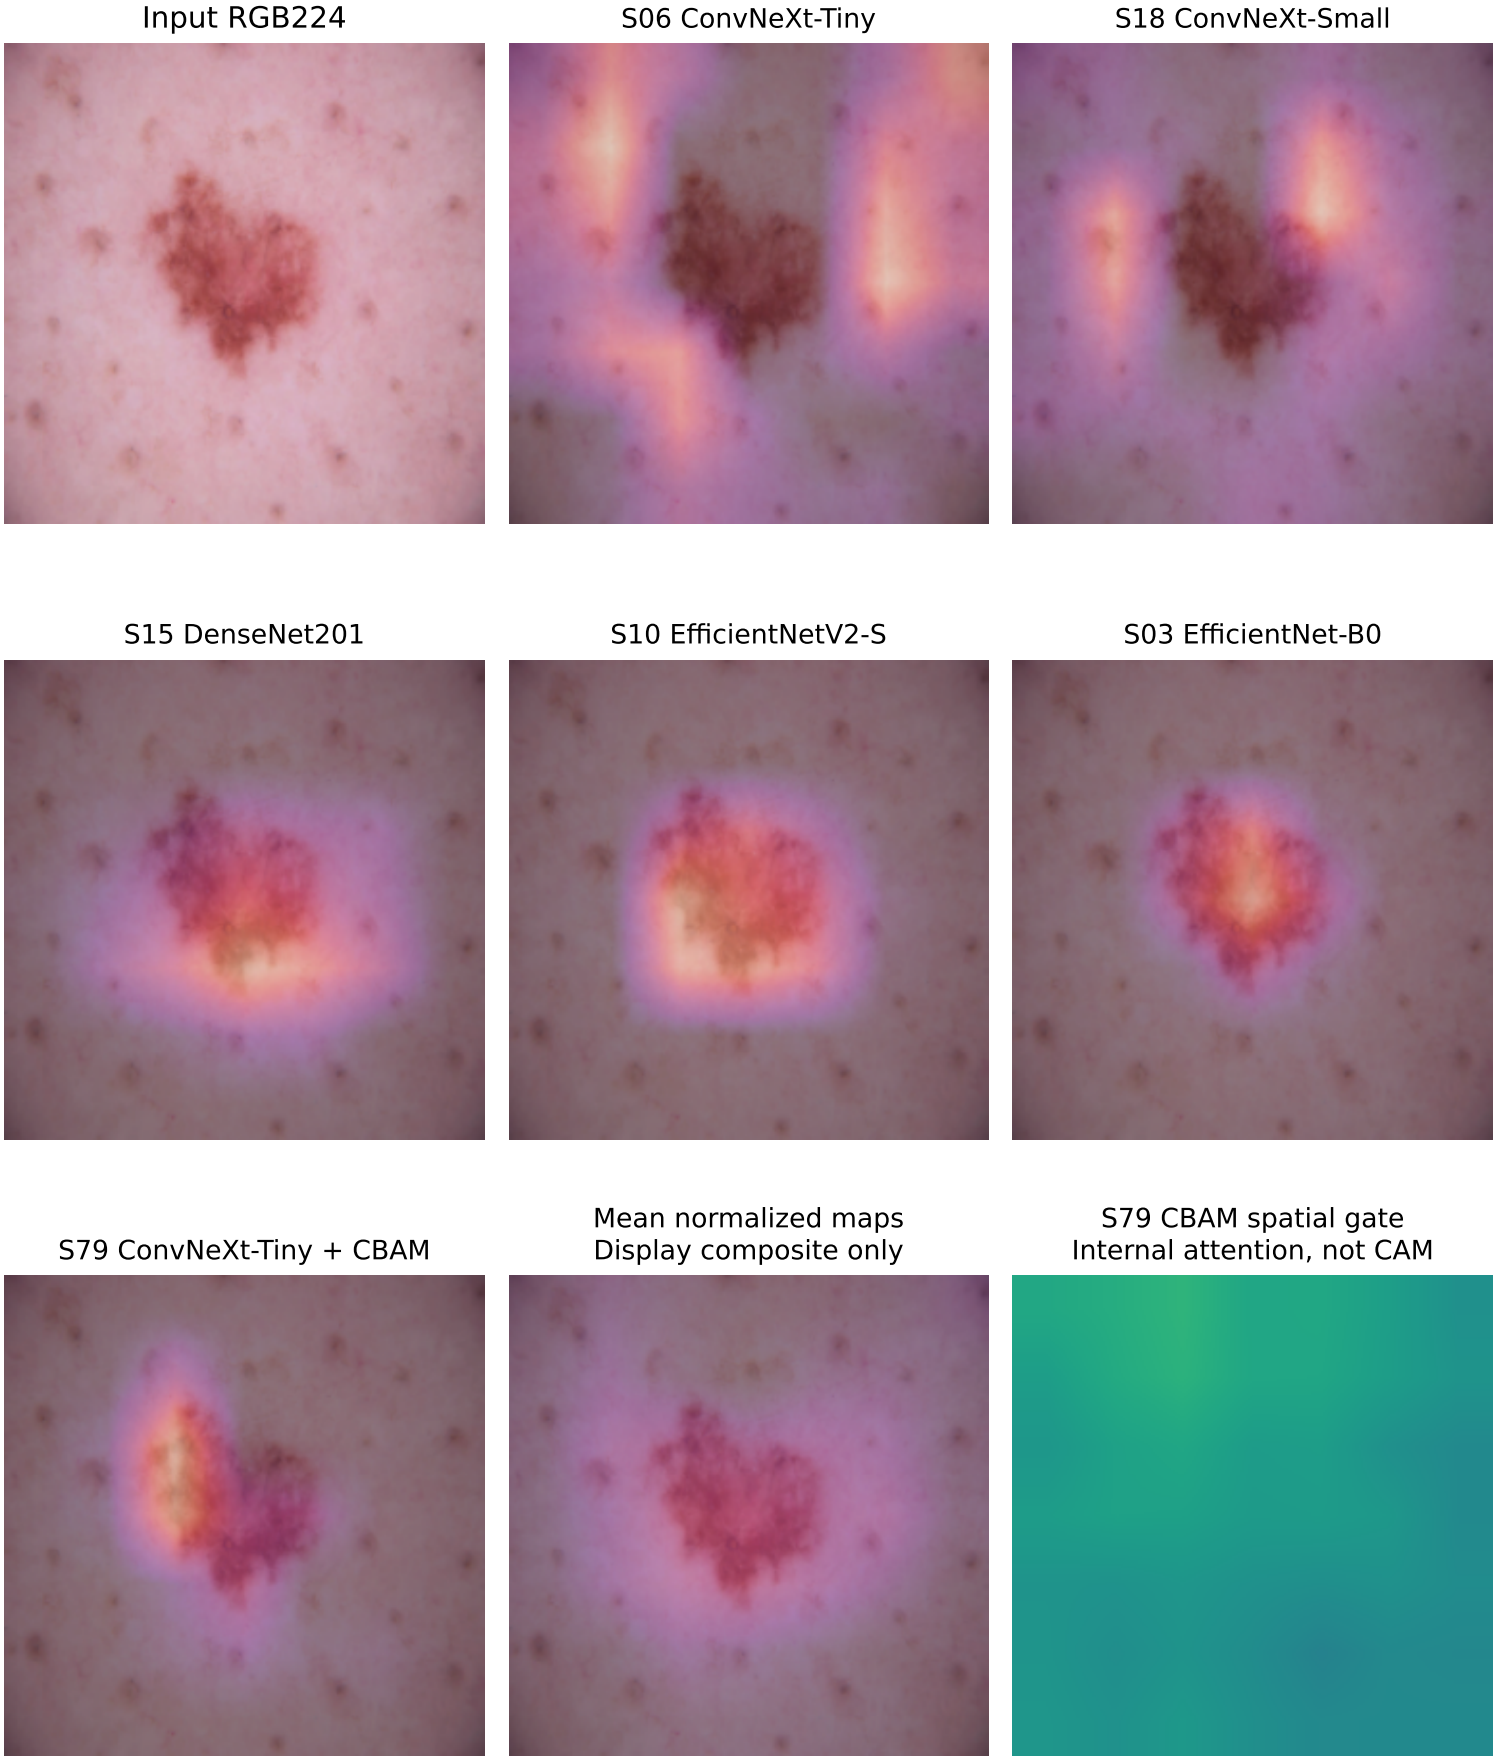

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0033808
True: df Prediction/Grad-CAM target: df Probability: 0.998

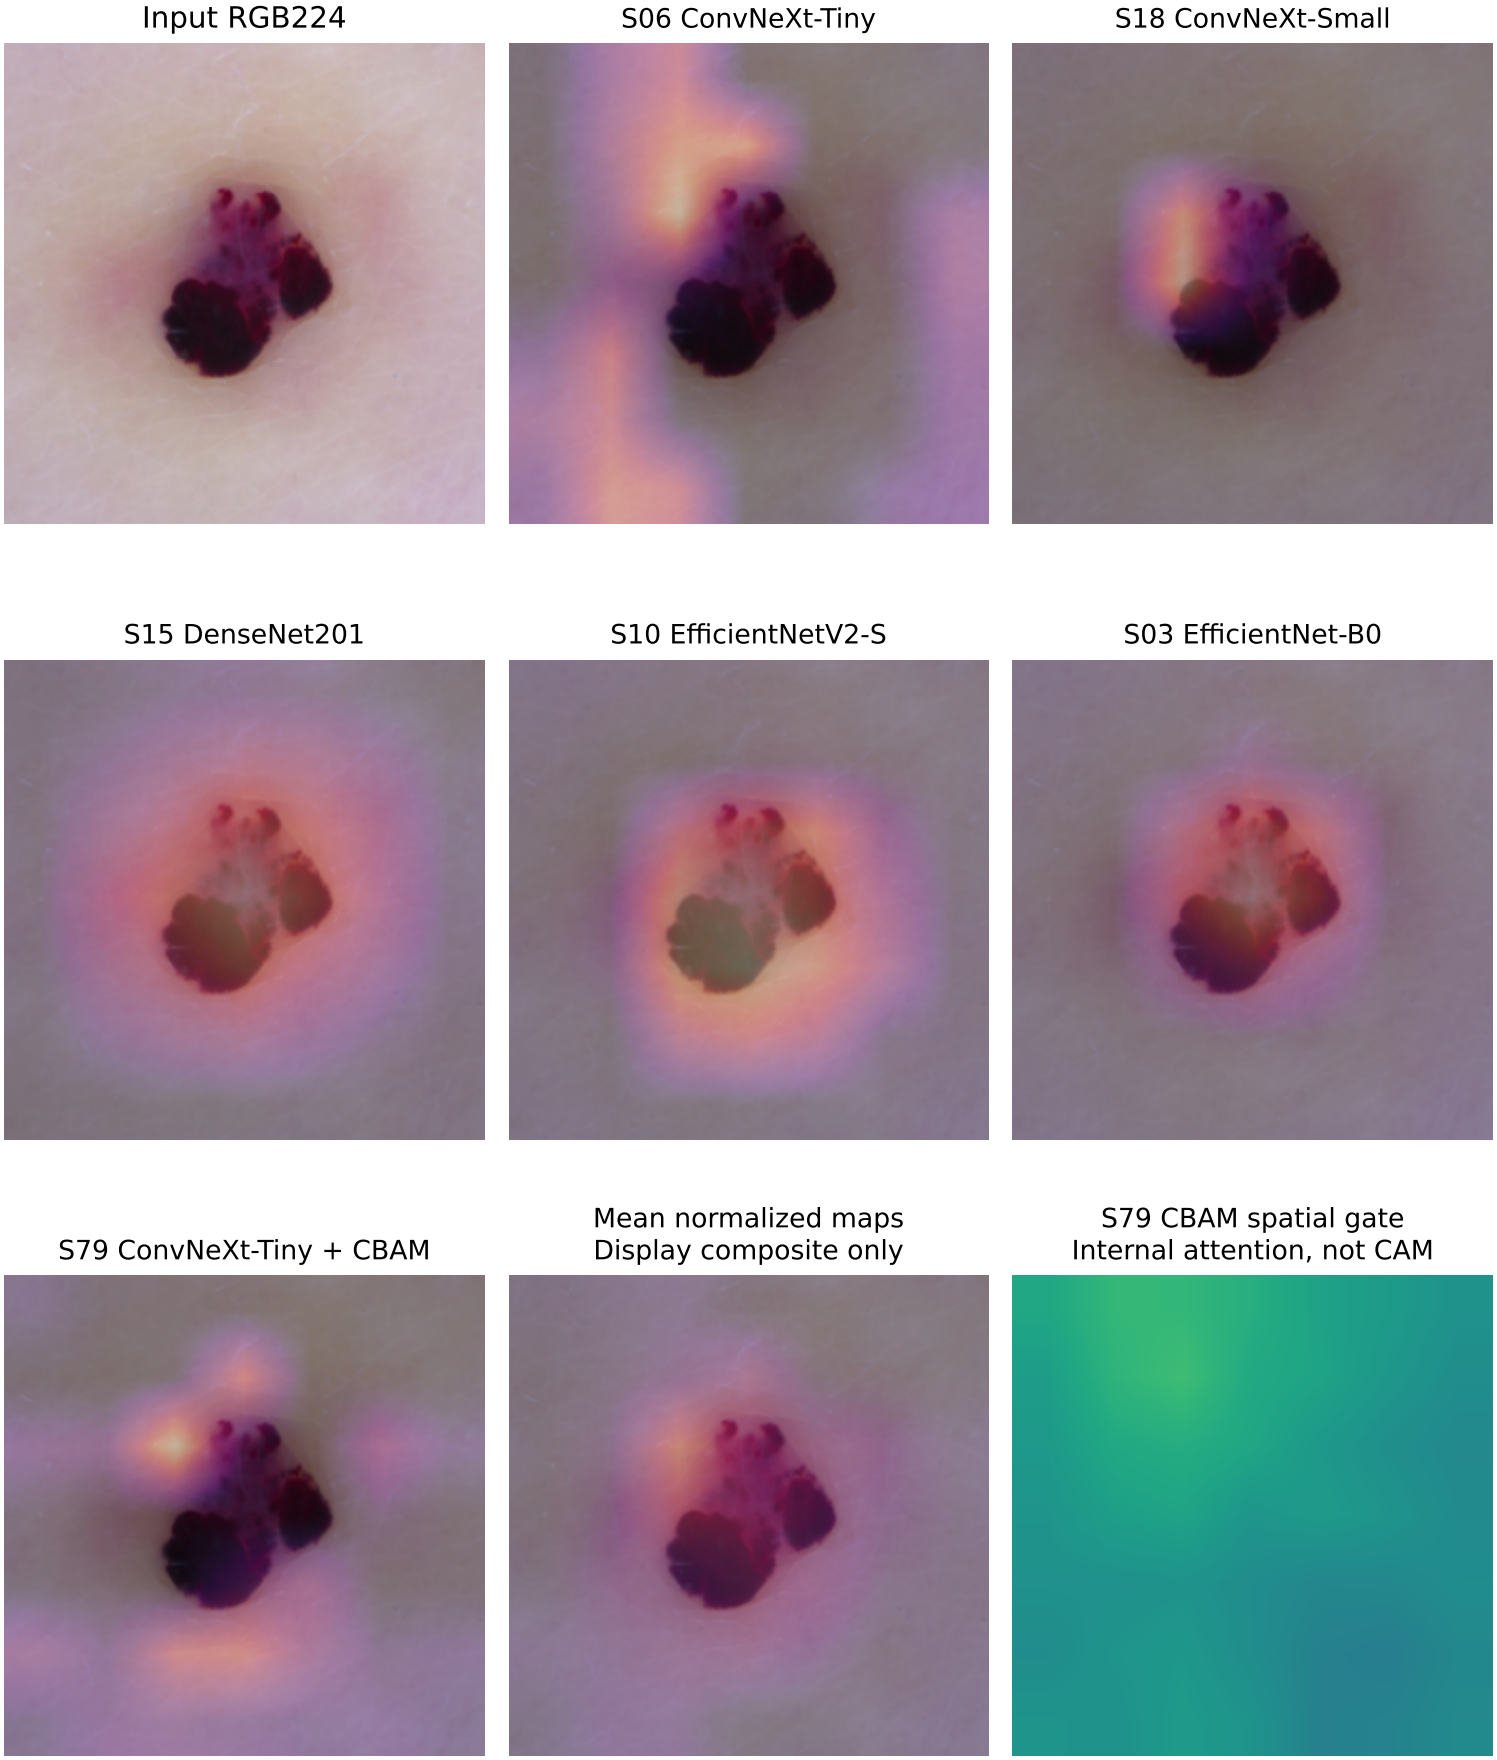

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0028408
True: nv Prediction/Grad-CAM target: nv Probability: 0.864

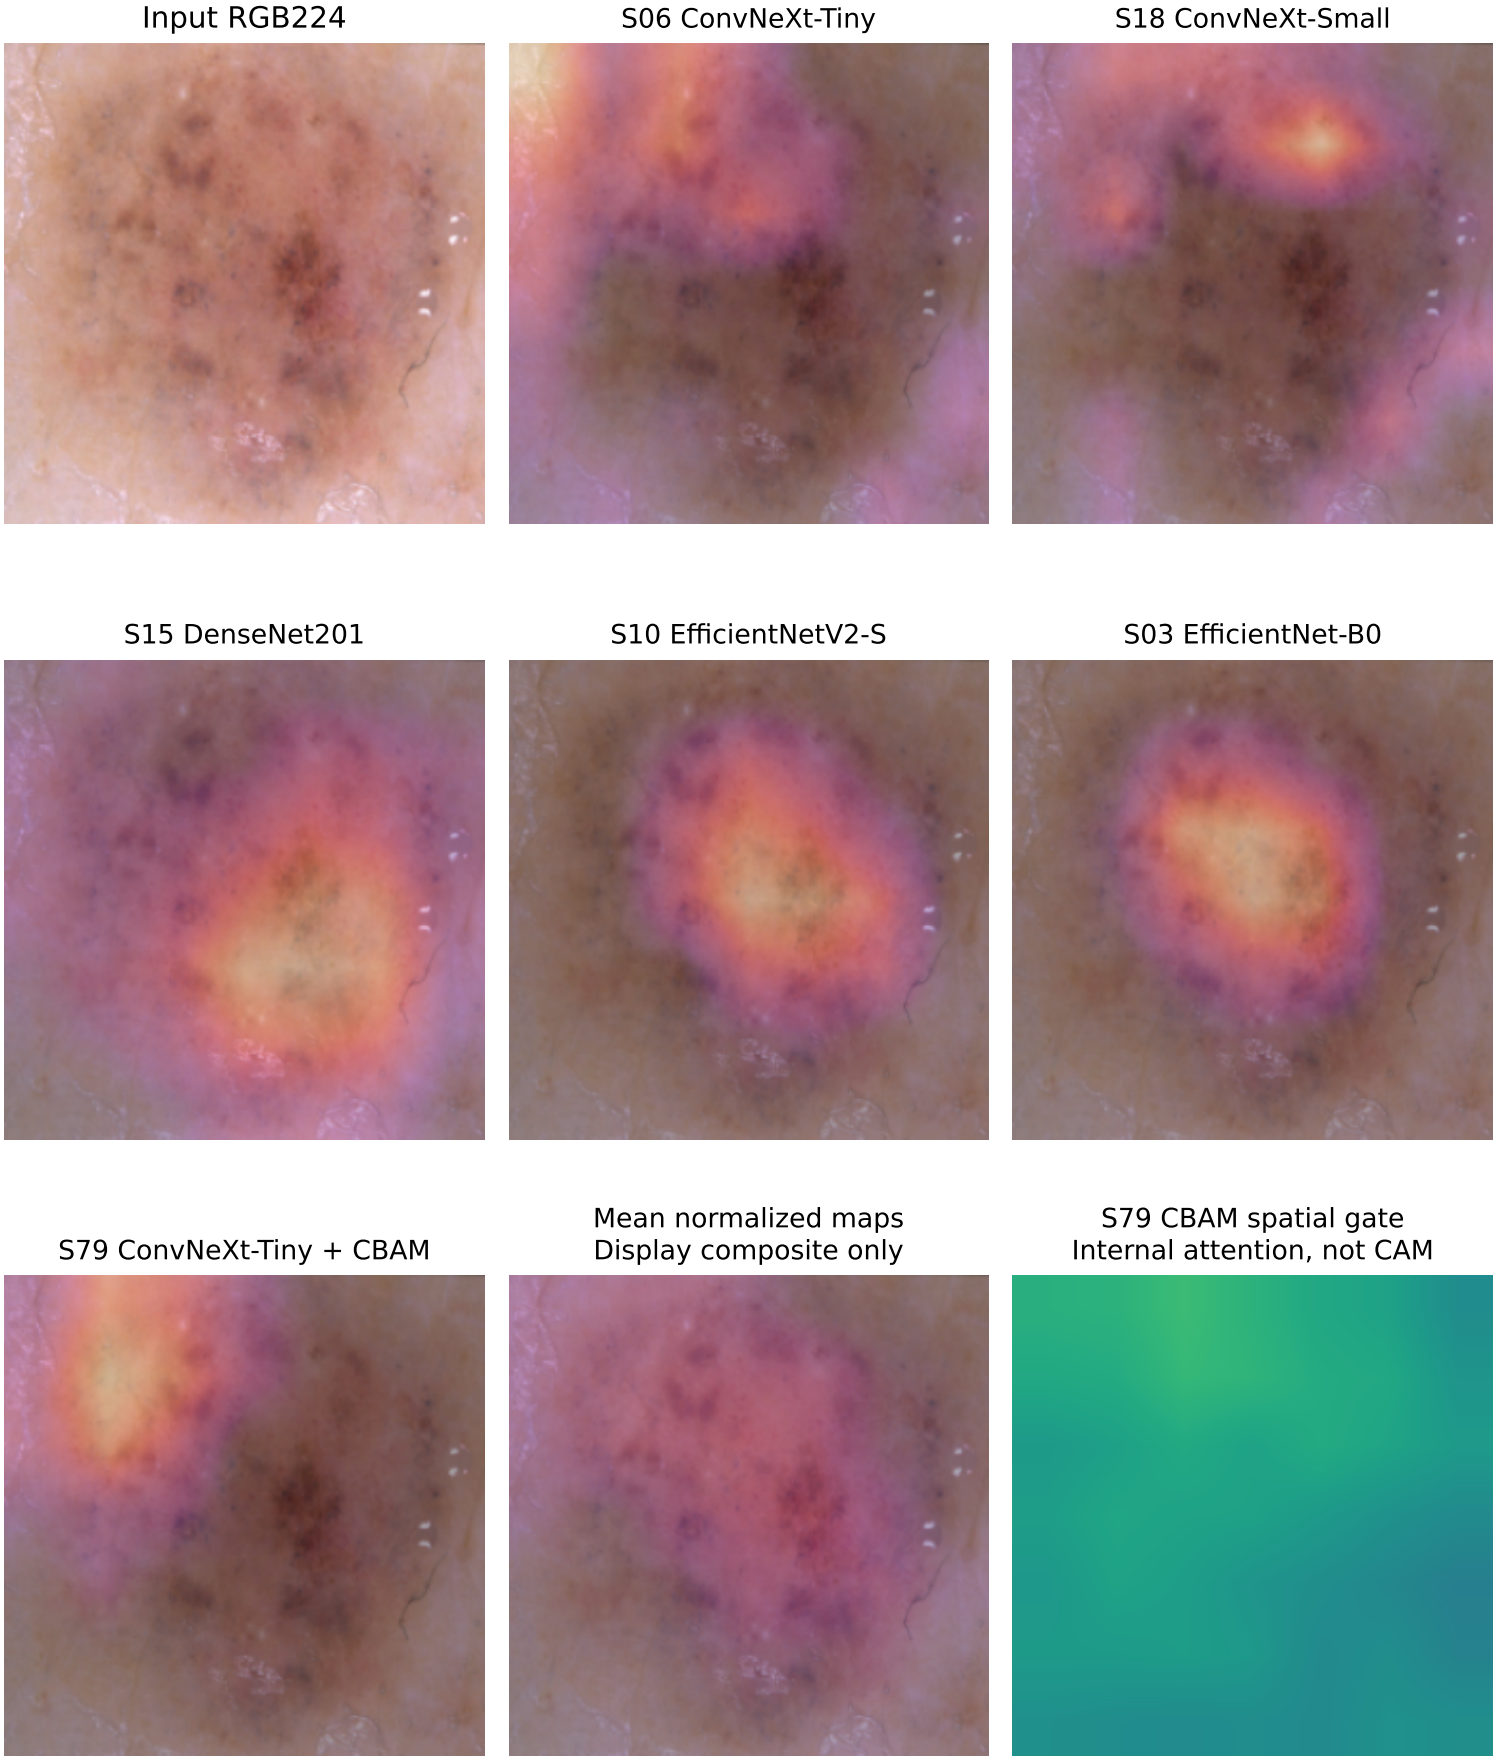

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0025924
True: vasc Prediction/Grad-CAM target: vasc Probability: 1.000

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

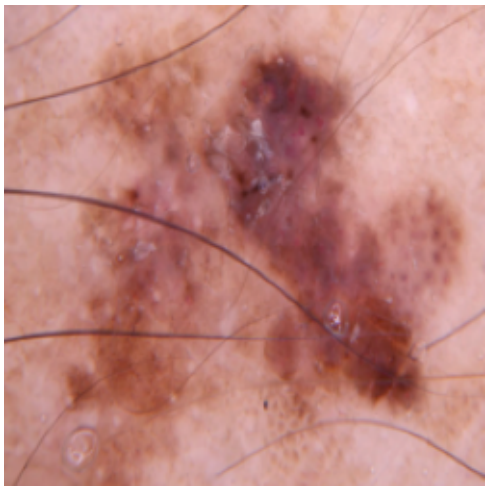

S83 | ISIC_0028173
True: mel Prediction/Grad-CAM target: nv Probability: 0.948

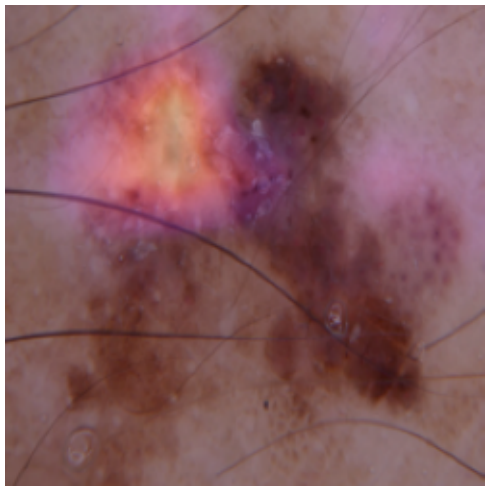

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0026623
True: bkl Prediction/Grad-CAM target: akiec Probability: 0.554

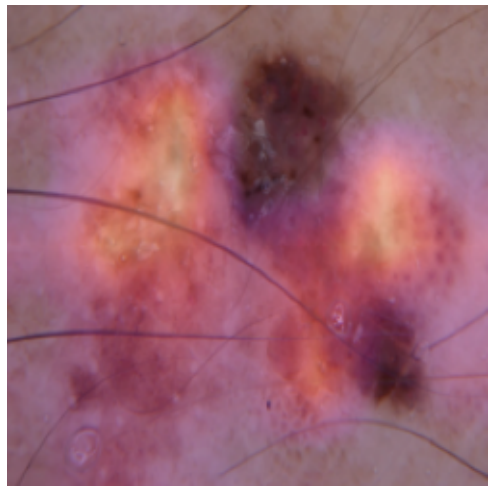

Input RGB224

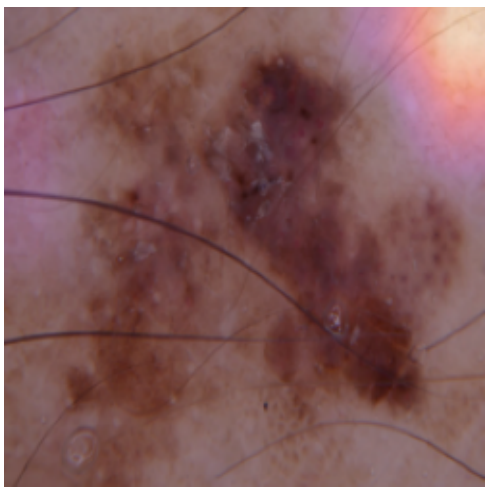

S06 ConvNeXt-Tiny

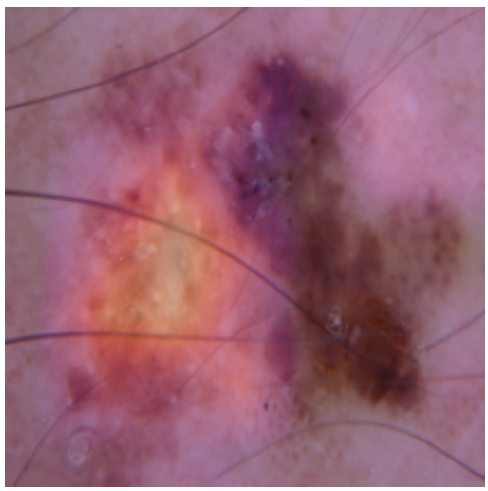

S18 ConvNeXt-Small

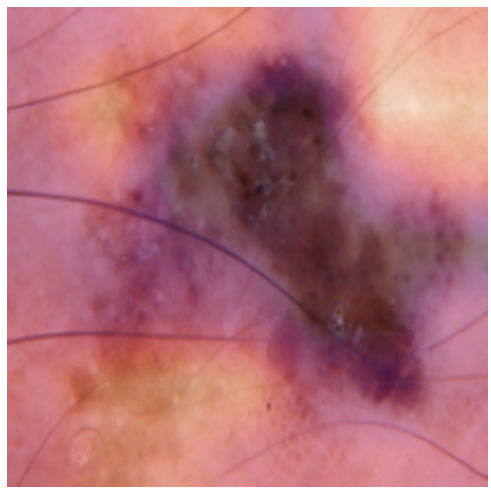

S15 DenseNet201

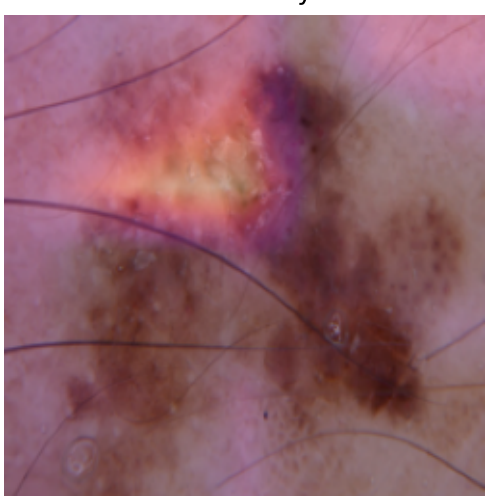

S10 EfficientNetV2-S

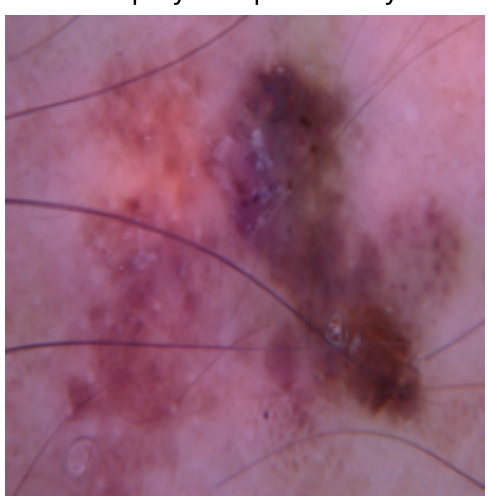

S03 EfficientNet-B0

S79 ConvNeXt-Tiny + CBAM

Mean normalized maps
Display composite only

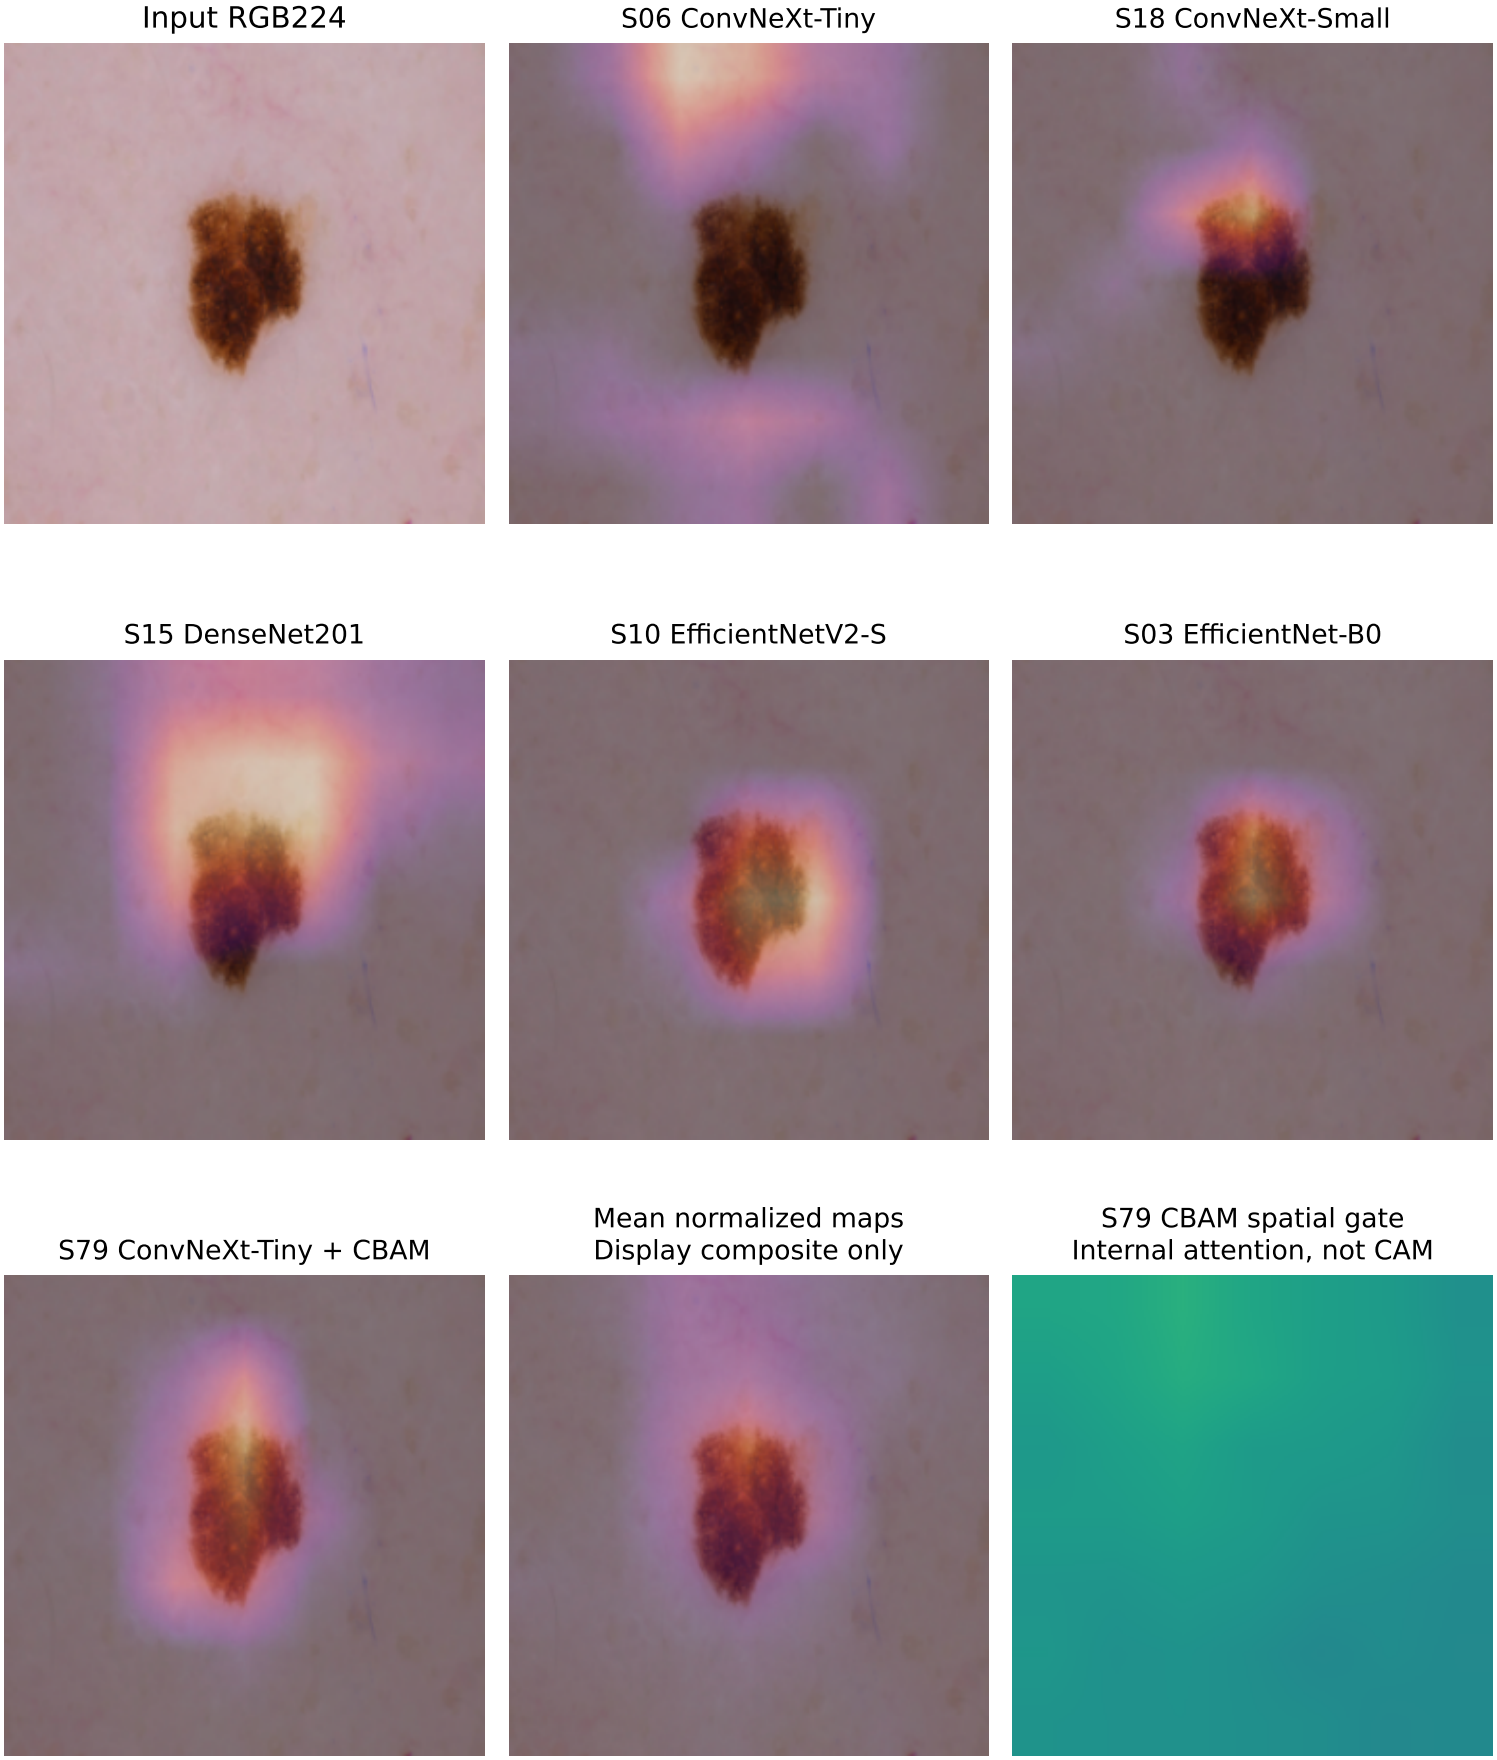

S79 CBAM spatial gate
Internal attention, not CAM

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.

S83 | ISIC_0028489
True: mel Prediction/Grad-CAM target: nv Probability: 0.753

Qualitative validation example. All six maps target the same ensemble prediction.
Hotter colors = larger positive CAM within each branch; scales are normalized separately.
